

# **To-Go Shelves**

Keep your takeout orders plate-ready perfect!

# Warm Up to the Masses

Ride the skyrocketing off-premises market like never before! Nemco's Heated To-Go Shelves distribute conduction-heat holding power across as many as 4,000+ square inches of surface area. So, you can keep your carryout meals plate-ready perfect and your carryout customers coming back for more.

## **Built for Volume & Versatility**

- Each shelf provides 18" x 48" of surface area per shelf—multiplied by up to 5 shelves!—for plenty of warming capacity, even during rush times.
- Proprietary heating element design dissipates a uniform heat across the entire surface area, with no cold spots!
- Each shelf is independently temperature controlled to accommodate a wide range of menu items.
- Vertically stacked configuration means more heating area in a smaller footprint.

# This Ain't No Lightweight Warmer

- · Heats as high as 220°F.
- All stainless-steel construction for even heat distribution and maximum durability.
- Cleans up with ease, so it's always presentable for front-of-the-house, contactless customer pickup.

#### Suggested Uses

This is a must have for any operation trying to optimize the off-premises market—especially if preparing to-go foods that require slightly higher warming

temperatures or longer hold times. It's ideal for contactless order pickup, but also great for kitchen wait stations, pass-through areas, serving lines, buffets, and more.

Stainless-steel construction for a contact surface that heats evenly and cleans up with ease

838-in<sup>2</sup> surface area (per shelf) can hold multiple to-go orders

Independent, infinite heat control for each shelf

Casters for easy mobility, so you can position for optimum pick-up convenience

### **General Specifications**

Model	Description
